

# Key messages

---

1. Full service, electrical infrastructure specialists  
The GSE service covers all your electrical infrastructure needs – from initial consult through planning, design, engineering, installation, connection and maintenance.

2. Size and strength. We have a large workforce, covering the whole of southern NSW with a depth of skill, qualifications and up-to-date accreditations that allows us to scale to suit projects of all sizes.

3. Reputation  
We are well known in the industry and have an excellent reputation for delivering quality work, setting high standards and maintaining a great safety record.

4. Experience and influence  
As one of the first ASPs to gain accreditation, we bring a wealth of experience, industry insight and influence, and enjoy strong relationships with, Essential Energy and Endeavour Energy, and peak bodies like NECA.

Beyond our own business, we work hard to shape and support the industry as a whole.

5. Consultancy  
We believe the key to strong relationships is communication and take a consultancy approach with clients throughout the life of their project.

6. Reliability  
We show up when we say we will and get the job done exactly as you need, first time.

We make ourselves available to help you when you need it and provide a 24/7, on-call service for maintenance.

7. Accreditation  
We meet stringent third-party QA, WHS and Environmental accreditation, with systems in place to maintain our commitments to these standards.
